PROJECTS

AI Teacher — Link & Think

FastAPI, React+TS, ChromaDB, Mistral-7B, RAG, HuggingFace

- AI study assistant — upload PDFs, docs, videos, or URLs and chat with them; streaming answers with inline source citations via a local RAG pipeline over the HuggingFace Inference API.

CerebroScan AI — Brain Tumor MRI Classification

TensorFlow, Keras, EfficientNetB0, Grad-CAM, Streamlit

- Deep-learning pipeline classifying brain MRI scans into 4 categories using a dual-model, 2-stage transfer-learning approach, with Grad-CAM explainability and an interactive Streamlit dashboard.

QA System in Finance

Mistral-7B, Q-LoRA, Chain-of-Thought, RLHF

- Fine-tuned Mistral-7B for financial QA tasks; achieved 56% accuracy, closing the gap with GPT-3.5-turbo's baseline (60%) via Q-LoRA, instruction tuning, and RLHF under limited resources.

Cross-lingual Embeddings for Low-Resource Languages

MUSE, Word Embeddings, NLP

- Built unsupervised cross-lingual word embeddings connecting Gujarati and Bengali, reducing dependence on parallel corpora for low-resource NLP.

Recommendation System for Amazon Fashion Data

Collaborative Filtering, Flask, React

- Personalized product-suggestion engine with a responsive Flask + React UI to alleviate choice overload.

Sentiment Analysis Platform

NLP, Flask, React

- Real-time sentiment classifier (positive/neutral/negative) with a user-facing web interface.

Human Activity Recognition

LSTM, Android

- LSTM-based classifier tracking human activities (walking, running), deployed in a mobile app for real-time monitoring and visualization.

SUMMARY

Software Developer at IBM and M.Tech graduate in Machine Learning (DA-IICT), with hands-on experience across the ML lifecycle — fine-tuning LLMs, building computer-vision pipelines, and shipping full-stack applications with FastAPI and React. I like turning research-leaning ML ideas into things that actually run in production.

EXPERIENCE

Software Developer at IBM

Jul 2024 – Present Gift City, Gandhinagar

- As a software developer at IBM I have contributed to feature development and resolved critical bugs on IBM Maximo to improve system functionality and user experience. Alongside core work, collaborated with the team on a side project building a RAG pipeline over Maximo's codebase, integrated with MCP to enable context-aware code assistance.

Software Developer Intern at IBM

Jan 2024 – Jul 2024 Gift City, Gandhinagar

- As a Software Developer Intern at IBM, I focused on fixing product bugs and also contributed to refactoring approximately 45 percent of the automation scripts.

ACHIEVEMENTS

 **1st Rank, Smart Gujarat Hackathon**
Medium Scale Category, organised by SSIP Cell

 **TCS CodeVita**
Ranked 2100 in Round 2

 **Google Code Jam I/O Women**
Ranked 4664

 **GATE CS**
AIR 4952 — strong theoretical grounding in computer science

Information Retrieval

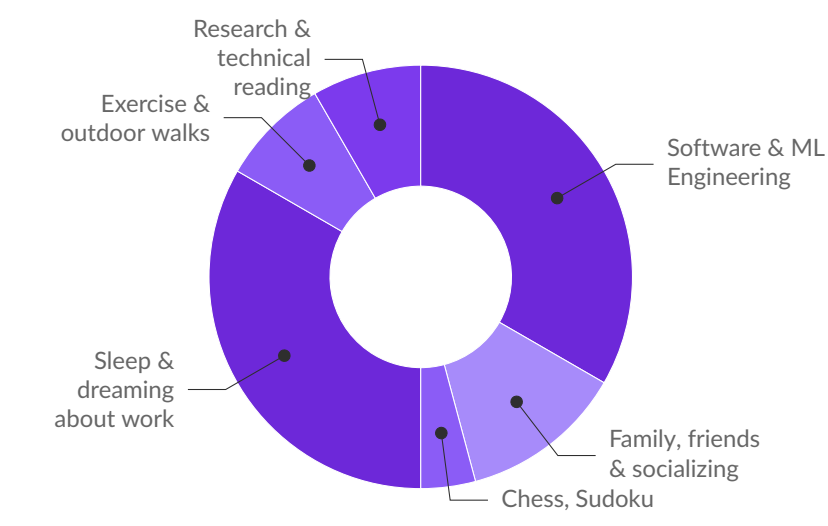

Research

TECHNICAL WRITING

Author of 20+ ML-focused technical articles on Medium, breaking down LLMs, RAG, and recommender systems with code and visuals for technical and non-technical readers alike. Selected posts:

- RAG Architecture Deep Dive: The Full Pipeline Explained
- Fine-Tuning of LLM
- Instruction Tuning: Teaching LLMs to Follow Human Directions
- Session-Based & Sequential Recommenders: What You Just Did Matters Most

A DAY IN MY LIFE

EDUCATION

M.Tech, ICT (ML Specialization)

DA-IICT, Gandhinagar

2022 – 2024

B.E., Computer Engineering

LDRP-ITR

2018 – 2022

CERTIFICATIONS

- Fine-tuning RL for LLMs: Intro to Post-training [DeepLearning.AI]
- Retrieval Augmented Generation (RAG) [DeepLearning.AI]
- Data Science Foundations - Level 1 [IBM]
- Trustworthy AI and AI Ethics [IBM]
- Docker Essentials: A Developer Introduction [IBM]
- Prompt Engineering for AI Bootcamp 2025 [Udemy]
- Machine Learning A-Z [Udemy]
- Data Base Management System [NPTEL]
- Programming in C/C++ [NPTEL]
- Introduction to Programming in C [NPTEL]
